Prof. Kumar Vyas – “Design as a concept is constant and changeless. On the other hand it is the image of design that is ever changing.”

Prof. M P Ranjan – “Design is ... A modern human activity that can help create the products, services and policies of the future with in the constraints of our contexts.”

While ‘Technology’ addresses the “Possible”, design addresses the “Desirable” and finds ways to express it in the real world.”

Equivalence of Modern design lies in
Indian Traditional Practices

Craft Documentation

Field work research project which helps students to inculcate genuine respect for the craft persons, textile traditions and skills and an appreciation for traditional wisdom.

To sensitize students to indigenous method of working with material, tools and learning their design process which evolved over centuries.

To understand socio, economic, cultural and historical context of the craft.

RAJASTHAN

The quiet village of Pushkar is transformed into a noisy arena of donkey, camel and horse races from October to November when it hosts Pushkar Mela, the largest camel fair in the world.

Districts – 32
Craftspersons – 3,16 Lakhs

- With the majestic Mehrangarh Fort towering over opulent palaces, colourful bazaars and the sands of the Thar Desert, Jodhpur epitomizes the romance of feudal Rajasthan.
- A view of the sprawling city of Jaipur from the 17th century fort at Amber, the former capital of the Kachhava dynasty of Jaipur.
- Stretching along the eastern shore of Lake Pichola is Udaipur's City Palace—a fascinating combination of Rajput military architecture and Mughal style decorative techniques.

Physical Features

- Aravalli Range
- Thar Desert
- Gulf of Kachchh
- Eastern alluvial plains
- Southeastern plateau

Major rivers: Chambal, Banganga, Ghambal, Luni, Mahi, Sabarmati, Ghaggar

Biodiversity

- Wetlands
- Flora: Bamboos, Euphorbia, Ber, lac host, Pipal, lac host, Rhizoc, Roheda (wood)
- Fauna: Tiger, Elephant, Camel, Peacock, Blackbuck

CRAFTS - RAJASTHAN

- Blue pottery of Jaipur
- Kundan jewelry – gem setting
- Mechanari – enamel work
- Lac ware
- Razer – quilt making
- Bamdhel – tie-dyeing
- Leheriya – tie-dyeing
- Block making
- Block printing of Bagru and Sangar
- Mojari – leather footwear
- Handmade paper
- Bank – clothbound book
- Felt products
- Sandhu – paper stencils
- Terracotta of Sawal Madhopur
- Kalpadi – puppets
- Wood and lac turnery
- Gotta work
- Tarkashi – metal inlay in wood
- Phool painting
- Stucco sculpture painting on wood
- Leather work
- Stone carving
- Stone relief and latticework
- Gesso painting
- Gangaur idol making
- Mughal embroidery
- Bhindi chitra – wall painting
- Miniature painting
- Sandwood carving
- Silver ware
- Wood work
- Dabu – mud resist printing
- Bone work
- Sheep ko kam – mother-of-pearl work
- Musical instruments
- Wrought iron work
- Panipat dhurrie weaving
- Prints weaving
- Terracotta and pottery
- Pastra kam – utensil making
- Camel trappings
- Pichwai – painted temple hangings
- Kovad – mobile shrines
- Terracotta of Mokela
- Damascening
- Metal engraving
- Kalpadi – weepwork
- Thewa – gold leaf work
- Silver jewelry
- Dabu printing of Alota

The ornate facade of the entrancing Hawa Mahal or the Palace of Winds has become an icon for Jaipur, called the Pink City because of its reddish pink buildings.

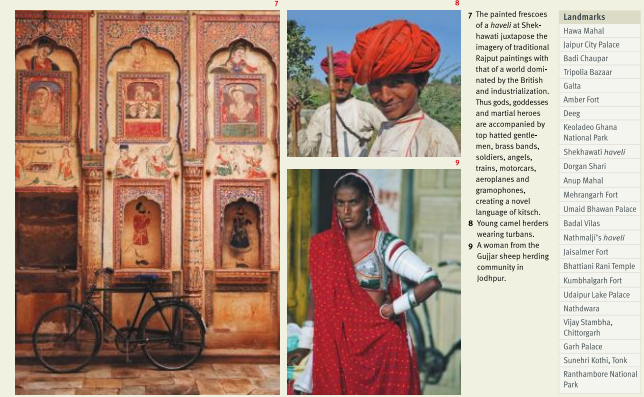

Detail of relief and pierced stone carved jali screen, at the Mehrangarh Fort, Jodhpur.

The annual Teej festival held at Jaipur celebrates the monsoons with processions of caparisoned elephants and bejewelled dancers.

UNTIL INDIA'S INDEPENDENCE IN 1947, Rajasthan, literally 'the land of kings', was what its name indicated—a region made up of more than twenty princely states, a bastion of royal affluence and feudal pageantry. Many stories abound regarding the bravery of the Rajput warriors who ruled this area; most of these dwell on the internecine war between the many royal houses and their opposition to the invading forces of Islamic armies from the north. Under the rule of the Mughal emperor Akbar a truce was established between the Rajputs and their non-Rajput neighbours, thus ushering in an era of political stability which occasioned lavish and consistent court patronage to the arts and architecture. Most of Rajasthan's once impregnable forts and opulent palaces have been opened

to visitors; tourism has breathed new life into these historic sites and quaint lifestyles they supported. Eighty percent of the region's population still lives in rural areas, engaged in agriculture and livestock herding; the rhythm of their lives punctuated by the frequent religious festivals and cattle fairs. Due to its position on the ancient migratory trail followed by nomadic and pastoral communities from Afghanistan, Pakistan and Central Asia, western Rajasthan shares a cultural legacy and craft vocabulary with the Sindhi and Baluchistan (Pakistan) regions of the Thar Desert and the Rann of Kachchh.

Inset: A painted depiction of an elephant, the royal mount, in full regalia, a palanquin perched on its back.

The painted frescoes of a haveli at Shekhawati juxtapose the imagery of traditional Rajput paintings with that of a world dominated by the British and industrialization. Thus gods, goddesses and martial heroes are accompanied by top hatted gentlemen, brass bands, soldiers, angels, trains, motors, aeroplanes and gramophones.

Inset: A woman from the Gujjar sheep herding community in Jodhpur.

M JAIPUR

JAIPUR, THE CAPITAL of Rajasthan, lies on the eastern fringes of the Thar Desert, a semi-arid land cut southwest to northeast by the Aravallis. At the end of the 11th century, the Kachhawaha clan established their kingdom at Amber. They were one of several powerful Rajput kingdoms, such as the Chauhans of Ajmer and Ranthambore, and the Rathore clan of Marwar region. The early Rajput states engaged in bitter intermenic clan wars, but with the rise of the Delhi Sultanate, their energies were directed at safeguarding their territories against the marauding Muslim troops. When imperial power at Delhi passed to the Mughal emperor Akbar, military and matrimonial alliances were forged between the centralized power at Delhi and the Rajput kingdoms, ushering in an era of cultural and social synthesis that had a great impact on the art and architecture of the region. In the 18th century, the capital of the Kachhawahas was shifted to Jaipur, the 'City of Victory' located to the south of Amber. Constructed under the supervision of the then ruler Sawai Jai Singh II and Vidhyadhar Chakravarty, a Bengali scholar and engineer, the city is one of north India's finest examples of urban planning. Surrounded by a crenulated wall pierced by seven gates, the city's plan is based on a grid of nine rectangular sectors, believed to represent the nine cosmic divisions of the universe. The grids are linked through a pragmatic system of main streets, intersected by pedestrian lanes leading to workshops and occupational colonies. Also figuring prominently in the plan are the spacious market squares operated by traders and artisans who migrated to Jaipur due to the tax benefits and other economic incentives provided by Sawai Jai Singh. The Jaipur of today is a melange of the modern and the living memories of the city's feudal past.

ACCESS
Jaipur is 262 km from Delhi and is well connected by road, rail and air. Alwar is 150 km from Jaipur, Bagru, 35 km and Sanganer, 12 km.

- Tarkashi* – metal inlay in wood

- At Udaipurwadi, Jhunjhunu, a craftsman creating the stitiated lac bangles that simulate the wrap resisted *Ieheria* textiles.
- Sheet metal is manually cut into thin strips that are then inlaid in wood to create the famous *tarkashi* of Rajasthan.
- A block maker demonstrating the carving process at his workshop in Jaipur.
- Amber fort Complex. The palace rooms are richly decorated with mirror work, coloured glass, carved marble, murals, mosaics and stained glass windows.

BLUE POTTERY OF JAIPUR

THE LOW TEMPERATURE glazed pottery of Jaipur is accorded the name 'blue pottery' due to its predominantly blue patterns. Wheel turning and moulding techniques are used in combination—the necks and bases are wheel-turned, the body is shaped in a plaster of Paris mould and the separate elements are joined. The surface is then engobed, a process involving the application of a clean white coat on the sanded and dried object so as to make the surface smooth, white and blot free. The patterns, largely florals rendered in the Persian style, are painted on in metal oxide pigments (mineral pigments) and the whole object is given a glass glaze. During the firing, the pigments develop the characteristic brilliant shades of turquoise blue, pale green, yellow and red-brown and the milky glaze turns transparent. Since the presence of water can cause the object to collapse during firing, blue pottery is dried at various stages during its production. The pottery is finished with a transparent glass glaze. Generally, women perform the task of grinding the pigments while men undertake the throwing and moulding of the pottery forms, the painting and the firing. According to local legend, Maharaja Sawai Ram II was watching his kite-master compete with other challengers when the thread of the imperial kite was cut by that of two brothers, Churamani and Kaluram, who were potters and had coated their kite string with the blue green glass-like dust of their pottery. The maharaja was impressed and gave them posts in the School of Art and settled them in the Goonga Mehra ki Gali in Gangori Bazaar; it was thus that blue pottery came to Jaipur.

Inset Coaster. Contemporary products like coasters and mugs are being made with improved glazes and reliable structural qualities.

A blue glazed vase of Persian origin; the influence of this style on the indigenous blue pottery is obvious.

- Production Clusters**
Jaipur district
- Products**
- Traditional:**
Surahis – narrow necked pitchers
Cylindrical jars
Lamp stands
Beads, Ear studs
Buttons, doorknobs
Mirror frames
Plates, Tiles
Soap cases
Jugs, Mugs
Coffee cups
Paperweights
Incense burners
- Contemporary:**
Ashtrays, Flowerpots
Lamp stands
Beads, Ear studs
Buttons, doorknobs
Mirror frames
Plates, Tiles
Soap cases
Jugs, Mugs
Coffee cups
Paperweights
Incense burners

- Tools**
- Thapki* – beating tool
Patti – metal strip
Chaka – potter's wheel
Silbata – traditional grinding stone
Bhatti – kiln
Sandpaper, sieves
Moulds, brushes

The surface of this vase is marked with the *Iehera* wave pattern, a motif that is shared with many crafts in this arid region.

A torus-shaped flower vase.

A locally developed turquoise glaze draws on the blue tiled mosques of Central Asia.

The untraditional motifs of this vase are derived from the representation of the lotus flower in the local miniature painting tradition.

BLOCK MAKING

Production Clusters
Jaipur city

Products

Wooden block with wire
Rekh – outline/lead block
Datta – foreground/filling block
Gadh – background/blotch block

Tools
Compass, Hammer
Drawing tool
Impression tool
Drilling tool
Chisels, Files
Sandpaper, Saw

THE TRADITION of making hand-printed textiles, widely practiced in both Rajasthan and Gujarat is characterized by the use of imprints of geometric as well as stylized floral and animal forms. Both areas therefore have craft clusters that specialize in making blocks for block printing. These follow a specific grammar which consists of the outline or lead block, known as the *rekh*, the *datta* or the foreground filler block, and the *gadh*, the background or blotch block. The specialty of the blocks from Jaipur is the depth and intricacy of the carving, which allows for a cleaner surface and clearer printing. Also peculiar to Jaipuri blocks is the number of air passages,

The reverse side of a block, the handle and the holes drilled to ensure the passage of air through the block.

air in the block during the printing thus preventing the fabric from lifting when the block is raised. Due to its innate strength, blocks made of *sheesham* may last through 200 metres of printing and are therefore generally used for the outline or *rekh* blocks. Due to high cost of teak wood it is gradually being replaced by cheaper woods such as *roheda* and *bhujan*.

The carved *rekh* or outline block includes the minute details of the pattern including the veins of the leaves and the individual petals.

The *datta* or filler block with the form of the entire flower raised in high relief.

The *datta* or filler block with only the leaf patterns in relief.

The *gadh*, or background block with the base forms that are to be printed in solid colour blocks.

A hand drill is used to carve out the positive areas of the block in high relief.

The border of a block printed Sanganer textile; the forms utilized derive from the traditional vocabulary of *bel*, creeper or border and *buta*, a large floral motif.

BLOCK PRINTING OF BAGRU AND SANGANER

ALTHOUGH BOTH ARE practiced in the vicinity of Jaipur and share a common vocabulary of *bel* (creepers), *buta* and *buti* (floral motifs of varying sizes) and *jaal* (floral net), the block printing traditions of Sanganer and Bagru have distinct visual identities and social contexts. Selected for its abundance of soft water and clay suitable for the process of sun-bleaching fabrics, Sanganer was developed into a major printing centre under the patronage of the Jaipur royal family. Sanganer's graceful curvilinear floral motifs and colour palette of reds and blacks printed against sun-bleached white, cream or grey-blue backgrounds are defined as much by its employment of the

direct printing technique as by the Mughal influenced aesthetic prevalent at the court. Characterized by the sheen given to the finished cloth by the waters of the Sanjara River and a robust colour palette of indigo, black and red, green, pink and orange derived from natural sources; the mud resist, dyed and mordant prints of Bagru catered to the folk, trading, agricultural and artisan communities that constituted the local population. Each of these communities had a specific sartorial code; the combination of colours and motifs used on a printed skirt, veil or garment could identify the wearer's community and occupation as well as the season.

Inset Floral *buti*, motif.

Stylized floral *buta*.

Stylized floral *buti*.

Production Clusters
Bagru
Sanganer

Products
Dupatta – stoles
Odhna – wraps
Angocha – towels
Saafa, *pagdi* – turbans
Sari
Block printed yardage
Razai covers
Bedcovers
Cushion covers
Tablecloth

Tools
Chhaapa – wooden blocks
Tari – colour tray
Parat – colour pad
Thapi – scraper
Thathi – bamboo lattice

Stylized floral forms used as *buti*. Bagru.

A *buta*, larger floral form. Bagru.

Dabu – *asmani* style of colouring.

The *jaal*, used here as a floral net covering the entire surface of the fabric. Sanganer.

Various *buti* used in the prints of Sanganer.

A singular *buta* derived from the poppy flower; the border is created through a *bel*, or vine.
