# EXPERIMENTS

A top-down view of a wooden workbench cluttered with various materials and tools. In the upper left, several rectangular pieces of paper in different colors (white, grey, brown) are laid out on a dark surface, some with small white labels. A large, empty, light grey plastic tub sits in the center. To its left is a roll of white tape, a brush with a wooden handle and stiff bristles, a metal mangle, a whisk, and a white plastic container. In the foreground, there are several rectangular frames made of wood and metal, some with mesh screens. To the right of the tub, there are more rolls of paper, a metal lid, and some small plastic containers. The text "REFLECTIONS & FURTHER EXPERIMENTS" is overlaid in the center of the tub.

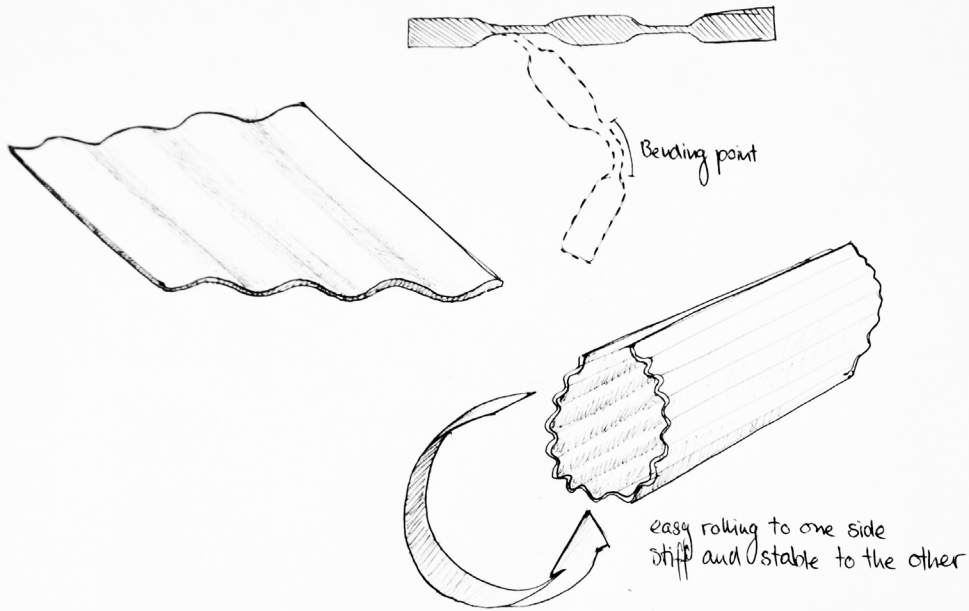

**REFLECTIONS  
& FURTHER  
EXPERIMENTS**

**waved paper**

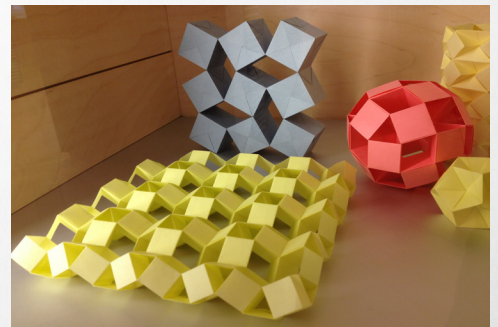

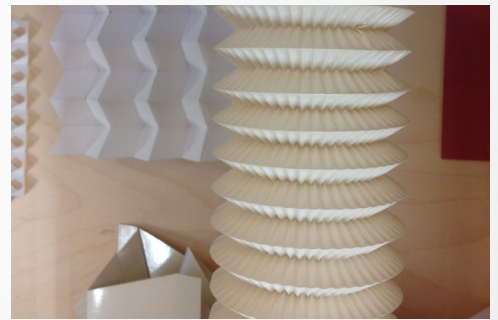

## → Pattern Folding

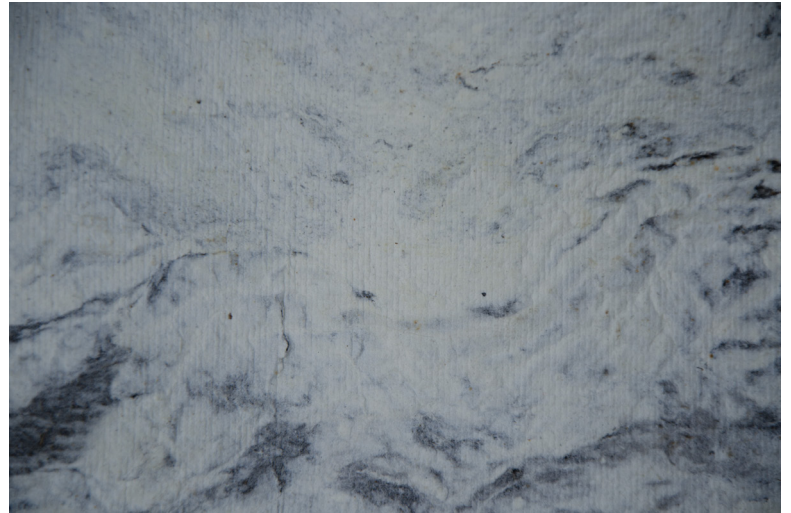

- different shapes / 3D
- different translucence

## → Packaging

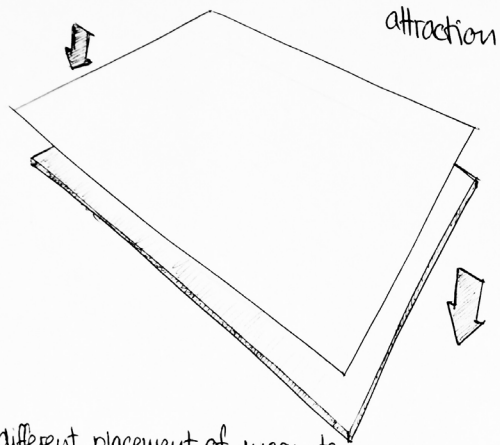

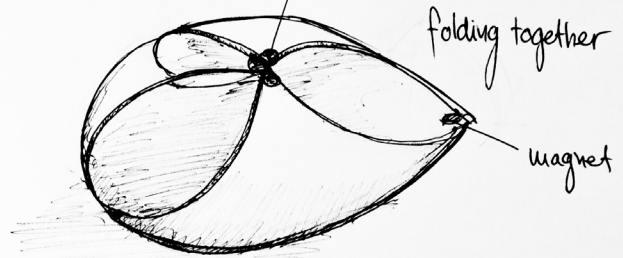

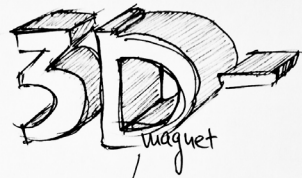

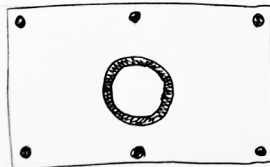

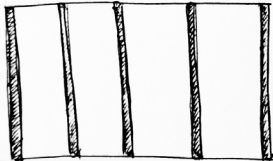

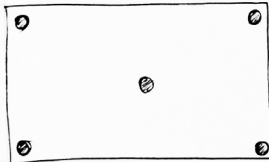

**magnetic paper**

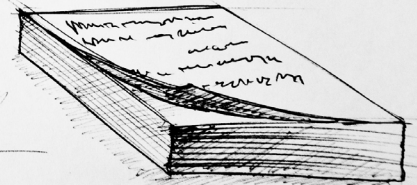

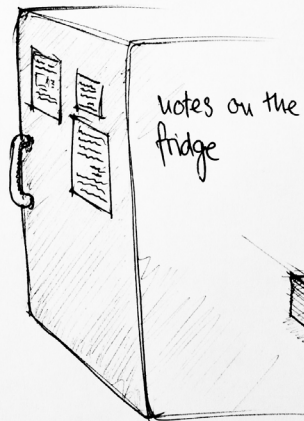

different placement of magnets

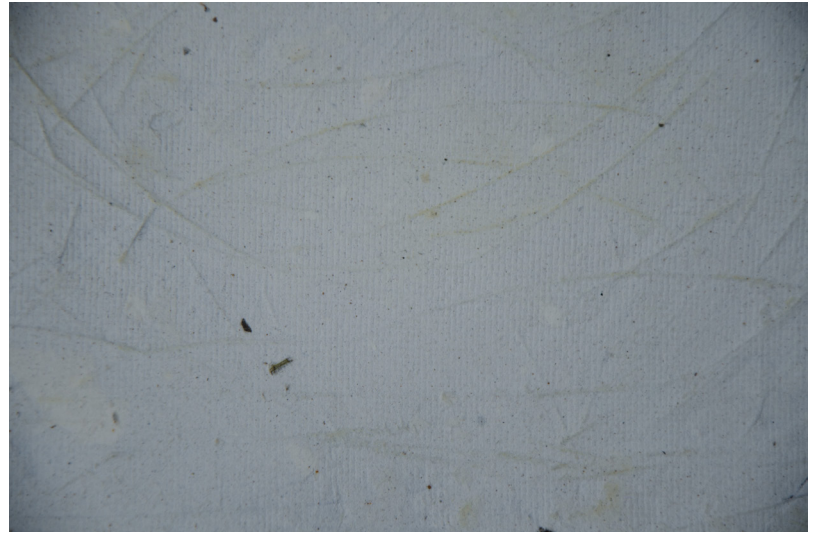

- packaging
- information signs
- advertisement

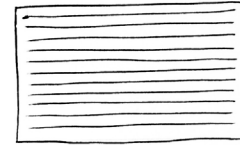

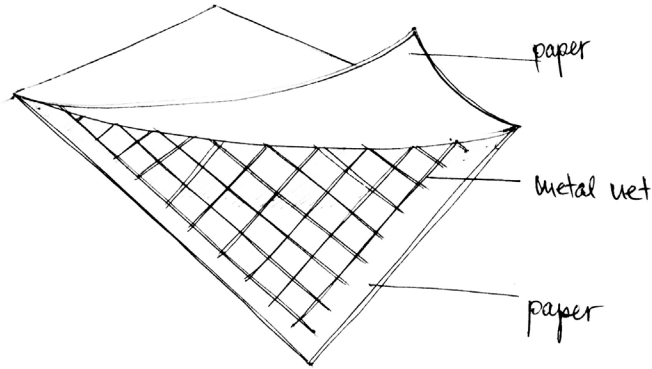

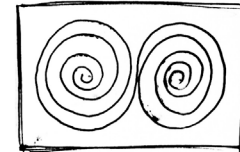

**iron wire paper**

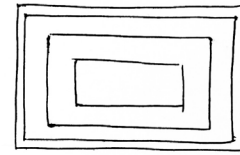

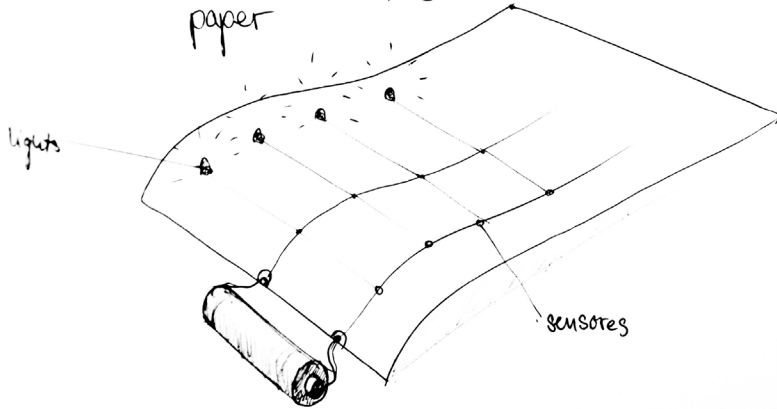

Different pattern will lead to different characteristics.

- folding into 3D space
- guaranteeing tensile strength
- difficult to tear

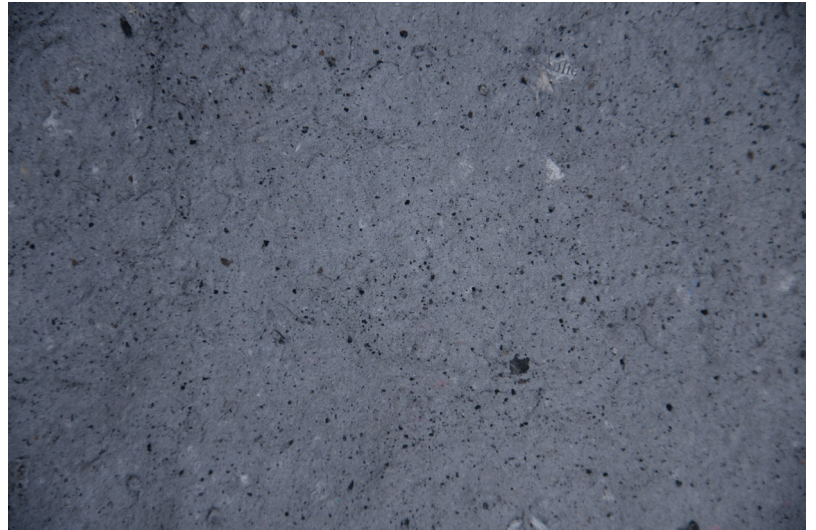

electric / interactive paper

Shaping in 3D

**ash paper**
